PROJECTS

Tiffin Service Web App

https://github.com/Karankhatik/tiffin_project

- Aimed to provide a platform for sellers to offer Tiffin services and customers to buy Tiffin from their nearest places.
- Took responsibility for designing and implementing the front end of the application
- Features - Sell Tiffin, Buy Tiffin, Login, Signup, Product Listing, Payment, Edit Profile, Forgot Password.

Expense Tracker

<https://github.com/Karankhatik/expense-tracker>

- Empowered users with insightful expense analysis and tracking with an expense tracker.
- I built Expense Tracker by first allowing users to sign up and log in securely. Then, I have created options for them to add or remove expenses. I also show users' spending using simple charts.
- Features - Login, Signup, Add Expense, Remove Expense, Update Expense Analyse Expense By Visual chart, Authentication using JWT.

College Games

- This application allows users to create games and add students to those games.
- To use the application, users must first sign up and then log in. Once logged in, users are required to purchase a subscription to access features like creating games, managing college lists, and adding students associated with colleges.
- Key Features: Authentication - Google, GitHub, and JWT, Subscription Based Payment, Sensitization form data using JOI.

Live Group Chat-App

- This application, built with the MERN stack, allows users to sign up and log in with their credentials to participate in group chats.
- Key features - User registration, secure login, real-time messaging using Socket.io, and application security through JWT (JSON Web Tokens).
